

# K3 Curriculum

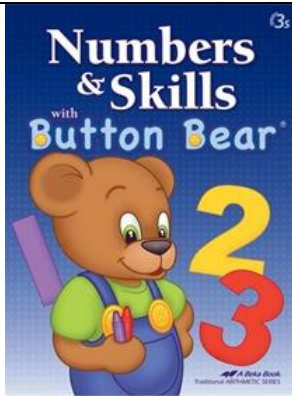

Teacher	Mrs. Daniels
---------	--------------

## Bible

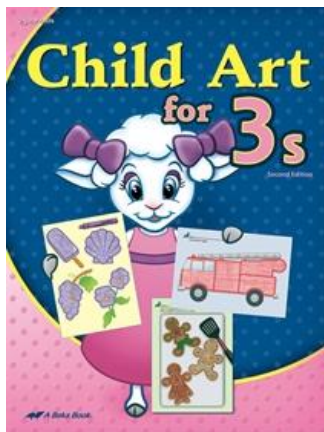

Bible stories are taught from both the Old and New Testaments with colorful visuals. Students take home lovely memory verse cards that help them remember what they have been learning.

## Numbers

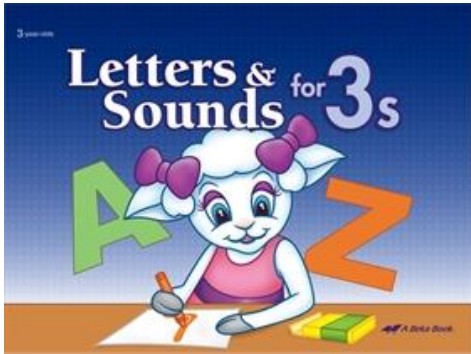

Your three-year-old is already capable of learning so many things! With this activity book, enhance his knowledge of shapes, pairs, opposites, numbers 1–15, sequence of events, senses, seasons, weather, animals, countries, transportation, dot-to-dot, coloring, thinking, and reasoning skills, listening skills, and more! The standard list of art supplies as well as the supply list for optional activities gives you the opportunity to plan so you can focus on your little one.

## Skills Development

Your little one has learned some amazing things in such a short time! Coloring in this book gives him a fun way to review his colors and shapes, develop hand-eye coordination, and enhance his thinking and listening skills. Reviewing each week's lessons on seasons, patriotism, Bible truths, health, safety, and science turns learning into fun! As optional activities, your child will love giving Button Bear *real* buttons on his coat or decorating a gingerbread cookie with glitter glue. A list of these optional supplies has been provided for you. Poems have been included on some of the pages to make learning even more fun.

## Penmanship

You want your child to enjoy reading. But, before he starts reading, he needs to learn the letters and their sounds. This ABC book gives a special animal friend to introduce each new letter to help your child recognize the letter as well as learn that letter's sound. Review is accomplished through small projects based on each letter. Activities include tracing practice and using finger paint, glue, and crayons. Your child will look forward to learning his ABCs with this stimulating activity book!
